

the best
things in life
are...

free

EcoBreeze is free of greenhouse gases,
free of chlorine, and free of headaches — water, tear and
curl resistant, and FSC certified, it degrades in soil,
leaving virtually nothing behind once it's no
longer needed.

Priced comparably to your standard nursery material, **EcoBreeze**
eliminates wasted time laminating signage and wasted energy
looking for a sustainable solution, giving you the most valuable
commodity of all — **more free time to focus on your priorities.**

John Henry® has
harnessed the wind
to create our new
line of custom nursery
tags, signage, forms
and folders to create
the sustainable solution
you've been waiting for.
